Technology at work for you

CONNECTING YOUR BUSINESS TO THE WORLD AND BEYOND

In a rapidly advancing information age, it is more crucial than ever that a business installs and maintains a communication infrastructure which serves our present and future needs. Net Electric's Communications Group is your end-to-end solution provider for your wired and wireless voice, data and multi-media networks. We are BICSI affiliated and enjoy the firm support from select Canadian system vendors and manufacturers.

Our highly skilled team of Certified Technicians and Project Managers are able to provide you with bullet-proof connectivity to meet your communication requirements for years to come. Net Electric's systems designers have a wealth of experience in many diverse environments including twisted pair, optical fibre, Wi-Fi, cellular, local area networks, wide area networks, computer room design, security, surveillance and CATV systems.

WHAT WE CAN DO FOR YOU

- INDOOR & OUT CAT3, 5E, 6A CABLING
- FIBRE OPTIC CABLE NETWORKS
- WI-FI, RFID & CELLULAR NETWORKS
- ANALOG, DIGITAL & VOIP VOICE
- INTELLIGENT BUILDING SYSTEMS

- AUDITS & RETROFITS
- TDR & OTDR CABLE TESTING
- SWITCHES, HUBS, ROUTERS & MORE
- NETWORK DESIGN & IMPLEMENTATION
- SOFTWARE & FIRMWARE UPGRADES

reliable connections for your business needs

STRUCTURED CABLING

Whether your data or voice network consists of a few PCs or many thousands of devices, your Structured Cabling is a critical part of your business.

Net Electric has the years of project experience to handle even the largest multi-campus installations while still caring enough to respond to each of our customers' service calls.

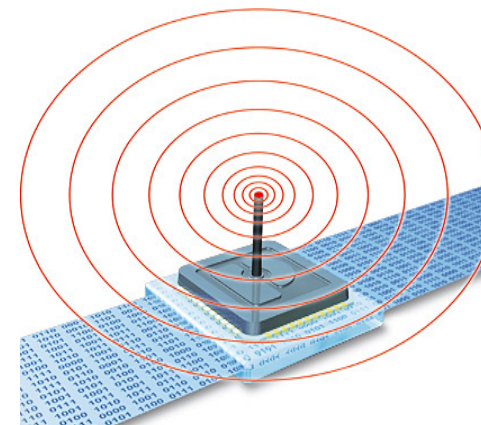

If you've been plagued by minor packet loss or outright network downtime you know that this comes with a real financial impact. Let one of our teams of highly trained Technicians work with you to determine the overall health and stability of this considerable asset.

BUILDING AUTOMATION SYSTEMS

Net Electric's Building Automation Group is ready to provide you and your facility with a tailored yet scalable control solution. We can liaise with your existing system provider or work with you to design an entirely new way of maximizing your energy dollar with "Green/Clean" thinking built right in.

WIRELESS SOLUTIONS

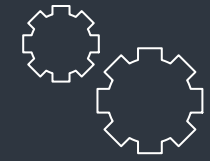

If you are considering a wireless network within your warehouse, office, hospital, school, airport, factory, or retail property you don't need to look any further than Net Electric.

We are a full service, high quality wireless network design and installation provider with years of experience under our tool belts.

Accredited by leading manufacturers, our design, consulting and installation teams provide you with the confidence and security your business demands.

- Wireless network feasibility & performance studies,
- Wi-Fi, cellular and RFID site surveys & reports
- Wireless network design and CAD drafting
- Wireless network installations, migrations & relocations
- Spectrum analysis & radio wave propagation studies

DESIGN & ENGINEERING

Our design and engineering services provide you with accurate, quick and cost effective services for your commercial, industrial, institutional and transportation facilities. We are extremely well versed in all aspects of CADD and are compliant with all applicable CEC, NEC, IEC, EIA/TIA and BICSI codes and standards.

CAMPUS & WIDE-AREAS

Does your network span beyond a single building? Do your growth plans include multiple sites? Net Electric's engineers can work with you to explore all of your Wide Area Network options. Whether you prefer a hard fibreoptic connection or a state-of-the-art wireless one, you are guaranteed a quality install.
