- PRESENCE DETECTION / ACCESS & MOVEMENT CONTROL
- LIFE SAFETY CONTROLS
- MAINTENANCE CONTRACTS
- 24 HOUR EMERGENCY SUPPORT

At your desk and around the globe

THE INTELLIGENT BUILDING & SYSTEMS MANAGEMENT EVOLUTION

With almost 40% of energy produced being consumed by buildings, and over 50% of buildings operating at less than 60% efficiency, your energy concerns (and costs) are top-of-mind like never before. Let Net Electric's Controls & Automation Group work with you to cleverly maximize your facility, controls and communication systems so that you can enjoy the comfort and savings which come from years of real world building experience.

For over 35 years, Net Electric has been at the forefront of developing and driving tailored efficient solutions for the commercial, industrial and heavy construction electrical contracting industry. Today, they've pooled their competencies and formed an industry-leading and highly regarded team, providing custom solutions for comfort, safety and energy efficiency to companies within the Greater Toronto Area and Southern Ontario.

innovative building solutions at your fingertips

BUILDINGS FOR TODAY & TOMORROW

Net Electric's solutions are turnkey, custom designed, cost-effective and easily operable. Above all, they're measurable, providing precise energy systems management solutions developed to not only build efficiencies and track power consumption, but also to maximize your Leadership in Environmental Energy and Design (LEED) qualification.

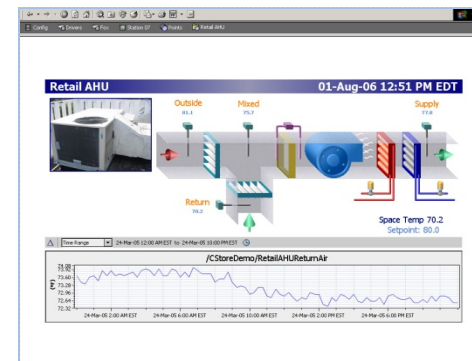

In the past, building automation and systems management has been hampered by the lack of practical and affordable communications technologies. Now, with new methodologies and technologies, we can affordably realize an automation scheme for most any building or facility.

SAFETY & QUALITY ASSURANCE

At Net Electric, we pride ourselves in our ability to complete projects on time, and on budget. Our strong commitment to the safety and well-being of our employees is our top priority. Continuous improvement, training and awareness are encouraged as is an unwavering commitment to Quality Control and Assurance.

INFINITELY SCALABLE, HIGHLY ADAPATABLE

The Net Electric Group is comprised of senior Systems Management Professionals, Electricians and a certified engineer, backed by software and hardware application consultants. Together, they're experienced with performing detailed audits and identifying the needs and "pain points" of your current system. Through this structured approach, inefficiencies will be discovered thus indicating where and how you can reduce your carbon footprint and sooner bring your green commitments to fruition.

- AUTOMOTIVE & AIRCRAFT PLANTS
- AIR & RAIL TRANSIT
- DATA & CALL CENTERS
- HIGH RISE RESIDENTIAL & COMMERCIAL
- PHARMACEUTICAL & BIOCHEMICAL
- RECREATION & COMMUNITY CENTERS
- SCHOOLS, COLLEGES & UNIVERSITIES

DESIGN & ENGINEERING

Our design and engineering services provide you with accurate, quick and cost effective services for your commercial, industrial, institutional and transportation facilities. We are extremely well versed in all aspects of CADD and are compliant with all applicable CEC, NEC, IEC, EIA/TIA and BICSI codes and standards.

LOCAL & WIDE NETWORKS

In a rapidly advancing information age, it is more crucial than ever that a business installs and maintains a communication infrastructure which serves our present and future needs. Our Communications Group is your end-to-end provider for your wired and wireless BAS, voice, data and multi-media networks.
